

MONTMARTRE

IN PARIS

A true village within the city, with its square (Place du Tertre known worldwide for its painters, portraitists and terraces), its church (Sacre-Coeur Basilica, a roman byzantine style building, completed in the early 20th century), its vines (planted in 1930 to fight against the expansion of real estate) and its small shops (the famous grocery stores of the blockbuster film "Amélie").
